PROFILE

Product designer and founder with more than eight years of experience across product design, UX/UI and visual design. I create intuitive digital experiences by combining user research, product thinking, information architecture, interface design and close collaboration with engineering teams.

I founded Devxin, a research and development group that creates AI-enabled products for innovation. My Automotive Engineering background supports this work, from shaping product ideas to building user journeys, design systems and implementation-ready interfaces.

EMPLOYMENT

Founder & Product Designer

Jun 2025 - Present

Devxin | AI product research and development group | Hanoi | devxin.net

- Founded Devxin, a research and development group that develops AI-enabled products for innovation.
- Turn ideas into focused product directions by framing user problems, target audiences and product value.
- Design end-to-end user journeys, information architecture, wireframes, interactive prototypes and interface direction.
- Build reusable design systems and clear handoff documentation for consistent implementation across platforms.

Product Initiative - Unswer

Current

Devxin | Founder-built visual AI research workspace | unswerai.ai/studio

- Conceived, planned and independently built Unswer end-to-end, from problem framing and product roadmap to UX/UI, AI architecture, QA and production deployment.
- Used an AI-assisted vibe-coding workflow to turn product specs and prototypes into a working web product, iterating across frontend behavior, AI workflows, source handling and production issues.
- Designed branching research, multi-perspective reasoning, source traceability, Research Tree and Understand; integrated Google AI Studio, Gemini Multimodal, Google Search, Firebase Authentication, Cloud Firestore and Google Cloud.

Product Initiative - Fcar

Current

Devxin | Unbiased car-advice application

- Define the product concept for an unbiased car-advice app that helps people make confident vehicle decisions.
- Research user needs and map advice, comparison and decision-making journeys for a trustworthy experience.

Product Initiative - Worklab

Current

Devxin | Education-to-employment platform

- Develop the product concept for a platform connecting high school and university students with companies through real-world projects, practical experience and job opportunities.
- Research the expectations and pain points of students, educators and employers to define the platform's core value and participation model.
- Design flows for onboarding, student profiles, company project briefs, project matching, applications, collaboration, feedback and experience records.
- Define trust and quality mechanisms that clarify project scope, responsibilities, expected outcomes and evaluation criteria for all stakeholders.
- Work with the team to prioritize the initial product scope and convert the service concept into testable prototypes and implementation specifications.

Product Designer

Apr 2024 - Present

LuatVietnam.com, CTC Technology JSC | Hanoi

ACHIEVEMENT: Third Prize for an Innovation Idea at CTC Technology JSC.

- Study user behavior with Google Analytics, Hotjar recordings, heatmaps and product feedback to identify friction, validate problems and prioritize UX improvements.
- Analyze complex legal-information journeys and reorganize content, navigation and interaction flows so users can find and understand information more efficiently.
- Create user flows, wireframes, high-fidelity interfaces and interactive prototypes for new pages, product features and responsive experiences.
- Design new components from scratch and improve reusable UI patterns to strengthen consistency across the LuatVietnam product ecosystem.
- Write clear design specifications covering states, interactions, responsive behavior and edge cases for development handoff.
- Collaborate with product owners, business analysts, developers and content teams; review implemented interfaces and resolve UI/UX issues before release.
- Propose product and process improvements based on evidence from user behavior, business priorities and technical constraints.

UX/UI Designer

Feb 2024 - Present

HIVO | Perth, Australia (Remote)

- Design workflows and interfaces for a Digital Asset Management platform serving customers with different asset structures, permissions and operational needs.
- Translate product requirements into user journeys, information architecture, wireframes, prototypes and production-ready interface designs.
- Develop and maintain the DAM design system, including reusable components, variants, interaction states and usage rules.
- Design HIVO web experiences in Figma and implement selected marketing pages in Webflow while maintaining brand consistency.
- Collaborate closely with product and development teams, explain design decisions, prepare handoff specifications and review implementation accuracy.
- Identify usability and consistency issues across the platform and propose improvements to design processes, patterns and customer experience.

Independent UX/UI Designer

Aug 2022 - Present

Freelance | Hanoi and international clients

- Gather requirements, clarify business goals and map end-to-end user flows for web and mobile products across enterprise, recruitment, healthcare and consumer domains.
- Create wireframes, interactive prototypes, design systems, high-fidelity interfaces and detailed specifications for development teams.
- Design the Ecospace emissions-management experience for a Hitachi-related client, supporting complex monitoring and operational workflows.
- Contribute to the TopCV SRP system and application design system, working with the product team on reusable patterns and product development.
- Design mobile experiences for Airzai in Dubai and build the design system and application interface for Vietnamese healthcare startup HODO.
- Support VSee product delivery through user-flow design, UI specifications and coordination around web-system implementation.

Mid-level Graphic & UI Designer (Onsite & Remote)

Oct 2019 - Aug 2022

Odessa Fashion Co., Ltd. | Hanoi

- Owned key visual and brand-design responsibilities across campaigns, digital channels and customer-facing materials.
- Developed concepts and visual direction for fashion-collection photo shoots, ensuring a consistent story across campaign assets.
- Designed the company website interface and supported digital-product work with freelance teams in Vietnam and overseas.

Product Design / UX/UI Leader

Sep 2021 - Jun 2022

Savis Technology Group | Hanoi

- Managed and coached a design team of approximately five members, supporting interns, freshers and junior designers through structured feedback and skill development.
- Applied research, customer journey mapping, user story mapping and JTBD to analyze complex user and stakeholder needs.
- Established UX documentation and collaboration practices aligned with Agile product development.
- Presented and defended product solutions to ministries, government agencies and senior project stakeholders.
- Led or contributed to health, education, tourism, portal, television, digital-signature, OCR and eKYC products.
- Worked on projects with partners including VTV, the Ministry of Health, Hai Phong Department of Tourism and Bac Giang Province.

UX/UI Designer

Apr 2021 - Aug 2021

Tokenize Exchange | Singapore (Remote)

- Researched user experience patterns for blockchain and digital-asset products, with attention to clarity, trust and risk-sensitive interactions.
- Designed and refined mobile and desktop features for a fast-growing cryptocurrency exchange.
- Collaborated with the product team to improve usability and interface quality in support of product-growth goals.

Graphic Designer & UI Designer

Mar 2017 - Sep 2019

Ilika | Hanoi

- Designed campaign landing pages and user-interface assets for a pharmaceutical startup.
- Created advertising visuals for Facebook, Zalo and other digital channels while supporting the marketing team's image and video content.
- Helped define a consistent visual direction for the brand across campaigns and customer touchpoints.

EDUCATION**Bachelor of Engineering in Automotive Engineering**

Dec 2023

Hanoi University of Science and Technology | Hanoi

- Built a technical foundation in vehicle systems, engineering analysis and automotive product development that now supports Devxin's automotive focus.

SKILLS

Product & UX: Product discovery, UX research, user journeys, information architecture, user flows, wireframing, prototyping, usability analysis, specification writing

UI & Systems: Figma, FigJam, responsive interface design, component libraries, design systems, interaction states, implementation review

Analytics & Delivery: Google Analytics, Hotjar, developer handoff, Agile collaboration, stakeholder presentation, team management

Additional: Webflow, graphic design, photography, 3D illustration, planning and logical problem-solving

COURSES

- Start the UX Design Process: Empathize, Define and Ideate - Google UX Design
- Foundations of User Experience (UX) Design - Google UX Design
- Business Administration - Certificate program
- UI Design - California Institute of the Arts
- UX/UI Design Foundations - Product Design certificate
